

NAME

`bg5conv` – convert a TeX document in Big 5 encoding into ‘preprocessed’ form.

SYNOPSIS

`bg5conv <infile> >outfile`

DESCRIPTION

Big 5 encoding for traditional Chinese uses the characters `{`, `}`, and `\` which have special meanings in TeX documents.

After processing a L^AT_EX 2_ε document which contains Big 5 characters with `bg5conv` you need not care about these special characters.

This filter is part of the **CJK** macro package for L^AT_EX 2_ε.

SEE ALSO

`sjisconv(1)`, `cefconv(1)`, `cef5conv(1)`, `cefsconv(1)`, `extconv(1)`,
the **CJK** documentation files.
