### NAME

extconv – convert a TeX document in either Big 5+ or GBK encoding into 'preprocessed' form.

### SYNOPSIS

**extconv** < *infile* > *outfile*

### DESCRIPTION

Big 5+ and GBK encodings use the characters {, }, and \ which have special meanings in TeX documents.

After processing a LaTeX $2_\varepsilon$ document which contains such characters with **extconv** you need not care about these special characters.

This filter is part of the **CJK** macro package for LaTeX $2_\varepsilon$.

### SEE ALSO

**bg5conv**(1), **sjisconv**(1), **cefconv**(1), **cef5conv**(1), **cefsconv**(1),
the **CJK** documentation files.
