

Test #4: PAGE ONE

1

This is page 1 - frame 1

This test spans two pages (this should be on page 1). It checks to see that using two separate templates works OK. It also tests to see that the "setNextTemplate" tag correctly splits the pages and displays them with the correct template.

Description of page: This page should have a single frame at the bottom of the page displaying this text, a big teal-coloured number "1" above it, and some header information above that.

This is the text for frame 1. This is the text for frame one. This is the text for frame 1. This is the text for frame one. This is the text for frame 1. This is the text for frame one. This is the text for frame one.. This is the text for frame one. This is the text for frame one. This is the text for frame 1. This is the text for frame one. This is the text for frame 1. This is the text for frame one. This is the text for frame 1. This is the text for frame one. This is the text for frame one. This is the text for frame 1. This is the text for frame one. This is the text for frame one.

Test #4: PAGE TWO

2

This is page2 - frame1

This test spans two pages (this should be on page 2). It checks to see that using two separate templates works OK. It also tests to see that the "setNextTemplate" tag correctly splits the pages and displays them with the correct template.

Description of page: This page should have two different frames at the bottom of the page displaying text, a big deepskyblue-coloured number "2" above it, and some header information above that.

This is page2 - frame2

This test spans two pages (this should be on page 2). It checks to see that using two separate templates works OK. It also tests to see that the "setNextTemplate" tag correctly splits the pages and displays them with the correct template.

Description of page: This page should have two different frames at the bottom of the page displaying text, a big deepskyblue-coloured number "2" above it, and some header information above that.
