

A CJK word breaking algorithm will break a word between the letters, since Chinese/Japanese/Korean languages do not use space to separate words. The algorighm also makes sure that certain punctuations will never appear at the beginning of a line. The 'wordWrap="CJK"' attribute for 'para' tag will instruct reportlab to use 'CJK' word breaking style.

With 'CJK' word breaking, the same text as above will appear as:

A CJK word breaking algorithm will break a word between the letters, since Chinese/Japanese /Korean languages do not use space to separate words. The algorighm also makes sure that certain punctuations will never appear at the beginning of a line. The 'wordWrap="CJK"' attribute for 'para' tag will instruct reportlab to use 'CJK' word breaking style.
