

Quick-Install Guide for BioAPI 1.2.2 framework

(BioAPI 1.2.2 framework is unofficial version of BioAPI 1.1, modified by Robert Snelick)

Notice

This guide utilizes third party products (such as Linux OS and BioAPI framework) which are not produced by UPEK, Inc. This is among others the reason why UPEK, Inc. can not support them.

Download link:

<http://www.grivy.net/~michael/blua/bioapi/>

Installation steps:

1. Login as a **root**, download, extract **bioapi-1.2.2.tar.gz** to local directory **/install/bioapi-1.2.2/** and switch to this directory.
2. Configure the package:

```
# ./configure --with-Qt-dir=no
```

3. Compile the package:

```
# make LDFLAGS='-R /usr/local/lib'
```

4. Install the package:

```
# make install
```

If you have any troubles while installing BioAPI, please contact the authors...

More information:

Please see the README file, which is part of BioAPI 1.2.2 framework package.
